

INFORMATION SECURITY AUDIT STATEMENT

Date: 28.05.2025
Customer: Vitec Avoine
Service: Sense registry and online service
Auditor: Second Nature Security Oy

Statement:

Independent auditor Second Nature Security Oy (2NS) has audited and verified the information security of the Vitec Avoine's Sense registry and online service. 2NS rates and has four (4) different severity levels of vulnerabilities which are low, moderate high and critical. According to the audit and the fix verification, the service has no identified critical, high, or moderate severity vulnerabilities at the moment the corrective actions were verified.

About the audit & verification:

The audit methodology was based on industry standards and best practices, such as OWASP (Open Web Application Security Project). The application's source code was not accessible and web application firewall (WAF) was enabled during the fix verification.

Time and workload of the audit & verification:

The audit was performed between 31st of October and 7th of November 2024 with a workload of 12 days. Implemented fixes were verified in May 2025 and the workload was 2 days.

Second Nature Security Oy (2NS) has audited hundreds of business-critical applications. 2NS has reported and released multiple advisories related to products of, for example, the following companies: A-Link, Buffalo, Checkpoint, F-Secure, HP, IBM, Oracle, SAP, Xerox, Zyxel.
